Resources for Caregivers 2004

MetLife Mature Market InstituteSM
and
National Alliance for Caregiving
in cooperation with the
National Association of Area Agencies on Aging
As a caregiver, you are not alone. Approximately 224 million households (one out of every four) provide unpaid care to someone over the age of 50. Family caregivers provide on average 18 hours of care weekly, some for a period of five years. This “free” care, however, is not without cost; many family caregivers feel isolated, stressed by balancing work, family, and caregiving, and perhaps even depressed. The value of family caregiving to society has been estimated to be $257 billion annually.

In 1996, close to two in three caregivers were employed, 52 percent full-time and 12 percent part-time. Family caregiving will present an even greater challenge to society in the years ahead. The number of households providing care by the year 2007 is estimated to increase to 39 million. In the past, responsibilities for caregiving almost exclusively belonged to women but currently about 25% of caregivers are men.

Resources for Caregivers was prepared by the National Alliance for Caregiving and the MetLife Mature Market Institute, in cooperation with the National Association of Area Agencies on Aging (n4a), to help individuals and families who have assumed the role of caregiver, or anticipate future caregiving. This brochure should be viewed as a starting point in your pursuit of resources. It provides mailing addresses, phone numbers and Internet addresses of national associations and organizations, plus an annotated list of caregiver-related books, videos and Web sites. Retail prices of books, tapes and videos are listed. The items in this guide are generally available at any bookstore. Other materials can be ordered using the addresses listed in the guide.

This guide was revised in 12/03. All information is time-sensitive and subject to change.
