

# THIS WEEK IN CAREGIVING

June 29, 2022

## CAREGIVING IN THE NEWS

### Caregiving for Children and Elderly Parents Can Strain Women Professionals

One of the defining moments of Karen Bond's professional career came about five years ago. "For years, I had worked really hard to become president of Executive Alliance," she said of the nonprofit dedicated to helping professional women succeed in leadership roles.

At the time, Bond was taking care of her mother who had dementia along with being a mother to her daughter and having a thriving professional career. "The day of our Women of Excellence luncheon, that I had always dreamed that my mother would be able to be there and see that achievement, was the day that my caregiver didn't show up and I was scheduled to be in front of a thousand women. I barely got there in time."

Caregiving can be extremely challenging for professional women as many must juggle their careers with motherhood and with their elderly parents/relatives. While home health care aides can help, a majority of women take on the caregiving responsibility themselves.

### This Is Us? How TV Does and Doesn't Get Men's Caregiving

This week, The Geena Davis Institute on Gender in Media, in partnership with Equipundo, [released their report](#) on the depiction of men as caregivers in entertainment media. While depictions of men as caregivers is growing and some bright spots are out there, mainstream entertainment continues to negate male care givers' vast numbers and capacities. This decades old trend in Hollywood

### What New Family Caregivers Really Need to Know

"Since my mom was recently diagnosed with dementia, I've been confused about what to do," said the 50-year-old woman at a neighborhood barbecue, balancing a paper plate with a hot dog and potato salad. "Different people give me advice about helping her and making sure I'm all right, but that advice isn't always the same. I feel like I have to figure this out on my own."

storytelling represents the worst kind of intellectual laziness. Such retrogressive narratives, masquerading as entertainment, create flat two dimensional male characters resulting in narratives which limit viewer engagement while also fostering in the continuation of a culture that seeks to dump care giving exclusively on women.

*From: The Good Man Project | Published: June 15, 2022*

[READ MORE](#)

Her confusion distressed me. There are millions of Americans in her position and tens of millions more who've gone through caregiving in the past. No one starting out as a caregiver, in my opinion, should have to reinvent the wheel. Yet when a parent or spouse is revealed to need care, most people feel lost about what to do. My neighbor wasn't exactly looking for me to give her more advice — it sounded like she'd had her fill already — but was hoping for a hint at least about where to start.

## NAC NEWS AND UPDATES

### NOW AVAILABLE: World Carers Conversation 2022 Session Recordings

World Carers Conversation returned May 19, 2022 as a global, virtual event with the support of EMD Serono and Embracing Carers. Innovators, researchers, policymakers and carer advocates from around the globe learned about advancements in the field, got inspired, and made connections that matter for the future of carers everywhere. These recordings cover the primary conversations and topics discussed.

To view the slide deck used in the event, click [here](#). To view the recordings, click below.

[VIEW RECORDINGS](#)

### Global Voices of Caregiving: A PhotoVoice Project

As part of the World Carers Conversation 2022, NAC worked with Chief Story Officer Anne Levy and caregivers from around the

globe to help them tell their own story through a series of photos. These photos addressed simple questions about being a caregiver, such as what works, what doesn't work, and what a world that embraces and supports caregivers would look like. Each one of these stories is unique to the caregiver's own experience and tells a diverse story of what it's like to care for others, an act which connects us all.

To view and hear these stories, please click on the red button below.

## Reimagining Clinical Trial Recruitment Through a Family-Centered Lens: Caregiver Recommendations for Enhancing Clinical Trial Participation Diversity

The National Alliance for Caregiving is proud to present *Reimagining Clinical Trial Recruitment Through a Family-Centered Lens: Caregiver Recommendations for Enhancing Clinical Trial Participation Diversity*, a new report developed with sponsorship from Traverre Therapeutics. Building on the priority area of clinical trials recruitment and retention identified in NAC's 2019 report *Paving the Path for Family-Centered Design: A National Report on Family Caregiver Roles in Medical Product Development*, this report synthesizes outputs from a series of three roundtables. In collaboration with Health Leads, NAC mobilized its network of researchers, policymakers, innovators, patients, families and caregivers to discuss and develop strategies for improving how researchers engage caregivers from populations most impacted by structural inequities in order to better understand how to increase representation of diverse patients in clinical trials.

Included in this report:

- Summary of caregiver expert convening including their key insights on caregivers' role in clinical trials and barriers to patient and caregiver participation;
- Summary of clinical trial roundtable including current strategies that improve caregiver engagement and support caregiver roles related to trials;
- Direct quotations from caregiver experts about their experiences with clinical trial participation;
- Outputs of a co-design session with both caregiver experts and clinical trial experts;
- Individual-level, community-level and systems-level focus areas for acting on these co-developed recommendations.

NAC's report underlines that engaging caregivers more effectively in the clinical trials process to promote better trial enrollment diversity requires investment and collaboration from not only industry partners and sponsors, but also from federal regulatory agencies, policymakers, healthcare leaders, community care providers and patients and caregivers themselves. Recognizing the value – the contributions, the expertise, the health impact – of what caregivers do, as partners in innovation, is a key part of creating a more equitable, person and family-centered health care system.

## The Circle of Care Guidebook Series

The National Alliance for Caregiving's *Circle of Care* library is a series of guidebooks dedicated to providing resources, support and information to caregivers caring for someone in a specific disease space. Part of an ongoing effort of NAC, these first three guidebooks were developed with the assistance of both patient-advocacy and consumer-facing partners:

- **Circle of Care: A Guidebook for Mental Health Caregivers**
- **Circle of Care: A Guidebook for Caregivers of Children and Adolescents Managing Crohn's Disease**
- **The Circle of Care Guidebook for Caregivers of Children with Rare and/or Serious Diseases**

NAC is proud to lend their expertise on caregiving through these guidebooks. To access the guidebooks for yourself and to share them with other caregivers in your life, please visit the link below.

# EVENTS & OPPORTUNITIES

**JUNE**

## 3rd Annual Virtual Caregiver Support Summit

**June 30, 2022 | 9:00 AM - 12:00 PM EST | Online**

On behalf of the GV Sonny Montgomery VA Medical Center Caregiver Support Program, we invite you to participate in the 2022 Virtual Caregiver Summit. Our goal is to engage with providers, caregivers, family members and, community partners, “To promote the health and well-being of family caregivers who care for our nation’s Veterans, through education, resources, support, and services.”

VA recognizes the crucial role that Caregivers play in helping Veterans recover from injury and illness and in the daily care of Veterans in the community. VA values the sacrifices Caregivers make to help Veterans remain at home. Caregivers are partners in the care of Veterans and VA is dedicated to providing them with the support and services they need.

To register, email [Shalonda.Carlisle@va.gov](mailto:Shalonda.Carlisle@va.gov) or [Ruth.Drake2@va.gov](mailto:Ruth.Drake2@va.gov).

For additional information, contact Caregiver Support Program at [601-364-1559](tel:601-364-1559).

## KNOW Stroke — How Acting FAST Can Save Your Life

**June 30, 2022 | 2:00 PM - 3:00 PM EST | Online**

In the US, every 3.5 seconds, someone dies of a stroke. What can be done to minimize that risk? This webinar will include facts about stroke prevention, who is especially at risk, how to recognize a stroke and act FAST, and the treatment options available including thrombolytic therapy, endovascular therapy and rehabilitative care.

Presenter:

Irina Rebello has been a Neuroscience Program Manager at Mercy San Juan Medical Center, a Comprehensive Stroke Program, since 2015 and is a volunteer for the American Stroke Association. She has been a registered nurse for over 22 years and holds a Masters of Science in Nursing Leadership. She is passionate about providing access to stroke care and is a frequent speaker and facilitator of community events.

**Caregiving and Our Longer Lives - The \$500 Billion Question**

Call for Applicants - Age Boom Academy 2022

Application deadline: June 30, 2022 • [ageboom.columbia.edu](http://ageboom.columbia.edu)

## Caregiving and Our Longer Lives – The \$500 Billion Question"

**Deadline to Apply: June 30, 2022**

The Columbia Aging Center and the Columbia Journalism School will host the 2022 virtual **Robert N. Butler-Jack Rosenthal Age Boom Academy: "Caregiving and Our Longer Lives – The \$500 Billion Question"** over four two-hour online sessions on October 13, 14, 20 and 21, 2022 (exact session times at [ageboom.columbia.edu](http://ageboom.columbia.edu)). **The deadline for journalists to apply is June 30, 2022.** Into its third decade, the Age Boom Academy is Columbia University's signature media training program for reporting on the opportunities and challenges of increased longevity.

If you are an on-staff or freelance journalist, you may apply to become a Fellow in this program co-led by Linda P. Fried, MD, MPH, Dean, Columbia Mailman School of Public Health; and Bruce Shapiro, Executive Director, Dart Center for Journalism and Trauma and Columbia Journalism School faculty. Selected Fellows will convene with researchers for an intensive, multi-session, online workshop focused on how to report effectively on the complex interplay of increased longevity and the U.S. informal caregiving economy. This topic crosscuts journalistic beats, regions and markets.

## The ABCs of Frontotemporal Dementias

July 7, 2022 | 11:00 AM - 12:15 PM EST | Online

Conversations with Dr. Tam Cummings - A Monthly Education Series for the Dementia Caregiver

The three domains and subsets of “young persons’ dementia” will be reviewed, allowing family caregivers an opportunity to identify the form of Frontotemporal Dementia (FTD) their loved one has and what to expect for the future. Often challenging to recognize as a dementia due to the person’s age, the FTDs can cause especially high levels of stress for the family caregiver. This session with Dr. Tam Cummings will address the stages, domains, unique behaviors and decline in persons living with FTD and the impact this disease has on the family caregiver.

Questions can be directed to [VirtualSeminars@arden-courts.org](mailto:VirtualSeminars@arden-courts.org).

To register for this event, click the red button below.

## **RELAX: Alternatives to Anger for Parents and Caregivers**

**July 14, 2022 | 1:00 PM - 2:30 PM EST | Online**

Hosted by Michigan State University, this interactive workshop for parents and those who provide care for young children is designed to help adults increase their knowledge about anger and strong emotion in young children and the developmental stages of social emotional self-control. Parents and caregivers will learn what anger is and what triggers anger, explore ways to practice and reinforce positive communication skills, and learn methods of incorporating children's literature into the process of teaching problem solving skills.

Facilitator: Georgina Guzman, [perrygeo@msu.edu](mailto:perrygeo@msu.edu).

This workshop is free.

Attendees must register by July 13. Click the red button below to do so.

## **New Learning Collaborative: Proxy Access for Older Adults**

**July 18, 2022 | 1:00 PM - 2:00 PM EST | Online**

**What:** OpenNotes is working on patient portal-based solutions to help older adults and their care partners get the information they need. We're excited to invite other collaborators to join us in this effort. To that end, we are convening a learning collaborative that will discuss best practices for increasing care partner adoption of the patient portal and other health information technology innovations aimed at increasing access to health information. We'll talk about health care organization-specific strategies and patient and care partner-centered needs.

**Who:** We welcome health care organizations and staff, professionals, patients, clinicians, vendors, and care partners to come together and learn from each other.

**When:** The collaborative will have quarterly, one-hour meetings beginning in July.

For more information about how to get involved with the learning collaborative, please contact Deb Wachenheim at [dwachenh@bidmc.harvard.edu](mailto:dwachenh@bidmc.harvard.edu).

### **Join our first collaborative meeting:**

The first quarterly meeting of our new learning collaborative on patient portal use for older adults and care partners will take place on Monday, July 18, 1-2pm EST. We welcome anyone interested in working together to improve access to healthcare information for care partners of older adults.

To register for the July 18 event, click the red button below.

## Webinar: AFPHS Training – Using Data to Address Social Determinants of Health

July 21, 2022 | 3:00 PM - 4:00 PM EST | Online

Data systems that include information on the health of older adults are crucial to developing programs and services that meet their health and social needs. Organizations and agencies can use this information to target resources, identify community partners, support grant applications, and develop strategies to address health disparities and social needs in their communities.

The July training will focus on the importance of data in addressing social determinants of health among older adults. This session will also highlight how some states have developed and used data on older adults to advance healthy aging in their communities.

**AUGUST**

*Leading*Age®

### **Larry Minnix Leadership Academy**

**Deadline: August 1, 2022**

The Larry Minnix Leadership Academy is designed to develop the leadership capacities and core competencies of aging services professionals by tapping into their natural talents and authentic leadership styles, irrespective of their professional experience, job title or type of position within an organization.

Unlike many leadership programs that focus on building a core skillset for new leaders or are geared toward nurturing a specific career path for “emerging” leaders, the Leadership Academy provides a leadership foundation rooted in reflective practice—developing a deep understanding of one’s self, uncovering one’s unique leadership attributes, and learning how to stretch and leverage those capacities to have the most impact as leaders.

The year-long curriculum draws on adult learning theory to delve into the core principles of reflective leadership through a variety of components. The program emphasizes self-exploration and relationship-building to enable participants to embrace diversity of thought, move beyond pre-conceived assumptions and view their own experiences and those of

others as learning opportunities.

To learn more about the Larry Minnix Leadership Academy, contact [BMoss@LeadingAge.org](mailto:BMoss@LeadingAge.org) or call 202-508-9490.

To apply, click the red button below.

## Apply to Be a Macy Faculty Scholar

**Deadline: August 1, 2022**

The Macy Faculty Scholars Program, now in its second decade, aims to identify and nurture promising early career educators in medicine and nursing. The Program will help develop the next generation of national leaders in medical and nursing education by identifying outstanding educators, physicians, nurses, and role models—individuals who represent the breadth of diversity seen in learners, patient populations, and health care settings around the country. By providing the Scholars with resources—especially protected time, mentorship, and a professional network of colleagues—the Program aims to accelerate Scholars' careers, to turn their teaching practice into scholarship, and to help them become impactful leaders locally, nationally, and beyond.

To learn more about the Macy Faculty Scholars Program, click [here](#). To apply, click the red button below.

## Why Do They Do That? Managing Common Challenging Dementia-Related Behaviors

**August 4, 2022 | 11:00 AM - 12:15 PM EST | Online**

[Conversations with Dr. Tam Cummings - A Monthly Education Series for the Dementia Caregiver](#)

Dr. Tam Cummings will discuss common behaviors witnessed by dementia family caregivers including:

Cursing  
Movement changes

Hunting and gathering  
Accusations of theft  
Taking away the car keys  
Sundowning  
Bathroom issues, including toileting and bathing  
Bedtime issues

We will also review the five senses which addresses changes leading to potentially dangerous or annoying behaviors. Stress relief tips will be shared, and handouts will include materials to self-measure caregiver stress and self-compassion.

Questions can be directed to [VirtualSeminars@arden-courts.org](mailto:VirtualSeminars@arden-courts.org).

To register for this event, click the red button below.

## Webinar: Navigating a Dementia Diagnosis and Care Needs

September 7, 2022 | 1:00 PM - 2:00 PM EST | Online

Knowing the warning signs of Alzheimer's disease is important for early detection and diagnosis. Family members often are the first to notice the signs, but may struggle on how to approach their loved one about scheduling an appointment with their doctor. Once they do broach the subject, they may be met with resistance or denial. If a diagnosis is received, the individual and their family may be at a loss for what to do next and what to expect for their loved one's care needs. As professionals, it is important to help older adults and their families navigate life after a dementia diagnosis by providing them with useful information and support. Join this webinar during World Alzheimer's Month to learn more about what to do next after a dementia diagnosis, what changes to expect and how to best care for someone living with dementia.

Participants in this webinar will be able to:

- Review the 10 warning signs of Alzheimer's disease and the importance of diagnosis
- Discuss what to expect after a diagnosis and what changes are likely to occur
- Learn communication strategies and care tips to best support the individual
- Discover resources for professionals and families for diagnosis, care and support

To register for this event, click the red button below.

## **PATIENT AND CAREGIVER STUDIES**

### **Participants Needed for Study on Caregiving for Family Member with Memory Problems**

Are you helping a family member with memory problems? The Virginia Tech Center for Gerontology is seeking grandchildren, siblings, nieces/nephews, and step family members (any relationship) living in Virginia to participate in a research study about caring for a relative with dementia living in the community (not in an assisted living or nursing home). This study involves one initial phone interview (approx. 70 minutes) and a brief phone interview for 8 days in a row (15-20 minutes each evening).

You will be asked questions about your experiences providing care, family involvement and use of paid services, and challenges you face caring for your relative.

Compensation is \$110 for full participation (VT IRB# 20-742). Interested? Visit the study website [careex.isce.vt.edu](http://careex.isce.vt.edu), call: 540-231-9250 or email us at [careex@vt.edu](mailto:careex@vt.edu).

## VetCareMind Project

Do you provide unpaid care for a veteran or non-veteran with a neurocognitive disorder and/or Post Traumatic Stress Disorder (PTSD)? Are you 18 years old or older? Do you have a computer, tablet, or smartphone? If so, researchers developing an intervention want your help! Eligible caregivers will complete an online survey before participating in two focus group interviews with 4 to 5 participants. The online survey will take about 30 minutes and the focus groups will be between 90 to 120 minutes each.

Participants will receive a \$30 gift card after each focus group interview.

For any questions about the study, please contact the research team at the following email or phone number:

Email: [vetcaremind@illinois.edu](mailto:vetcaremind@illinois.edu)

Phone: 217-244-9363

Principal Investigator: Dr. Sandraluz Lara-Cinisomo

To determine if you are eligible to participate, complete a brief online screening by clicking on the red button below.

# Weill Cornell Medicine

## Geriatrics & Palliative Medicine

### Are You Caring for a Loved One With Dementia

Researchers at Weill Cornell Medicine are conducting a research study examining well-being and resource use in dementia caregivers. The aim of this study is to identify and examine the needs of caregivers and the types of resources and support services that would be most beneficial to promote well-being in caregivers.

If you are eligible and agree to participate, you will be asked to complete an online survey lasting 20-30 minutes. Then, you will be given the option to participate in a follow-up phone interview with a member of our research staff. You will be asked to answer some questions about your demographic characteristics, care responsibilities, challenges experienced, and ways you have coped with those challenges. Then, you'll be asked to answer some questions about your use of community resources, barriers to accessing and using resources, and suggestions for resources that you would be interested in using in the future based on your own personal needs.

You will receive a stipend of \$25 for your completed surveys. For those who choose to participate in the open-ended interview, you will be compensated with another \$40.

If you have any questions about this survey, please feel free to email Francesca Falzarano [fbf4001@med.cornell.edu](mailto:fbf4001@med.cornell.edu) or call (646)481-2858.

## Recruiting Participants for a Study on Accessibility Information in Cities

Our research team at the University of Illinois at Chicago is inviting you to participate in a research study to improve the availability and use of data on sidewalk accessibility for people with disabilities. We would like your input to help understand new ways our tools and the data collected can be used to advocate for more accessible cities and be used by people with disabilities to better understand their community's accessibility.

Participation includes two 2.5 hours workshops on one these dates: May 5, 6, 9, 11, 19, 20. The workshop will be either at 10:00am to 12:30pm or 1:00pm to 3:30pm.

To maintain COVID-19 safety precautions the first workshop will be held virtually via Zoom. During these workshops our research team will lead group activities and discussions. We will focus on priorities, needs, and concerns related to accessible sidewalks, and hope to gain your valuable perspectives on the design and usability of a tool we developed. We are also interested in discussing the opportunities and needs around data on accessibility of cities.

Participants will receive \$50 per session for their participation.

To Participate in this workshop, participants must be:

- 18 years of age or older
- Speak and understand English
- Identify as a member of **one** of the following groups:

\*People with limitations in mobility OR

\*People who are Blind/low vision OR

\*A caregiver of a person with a disability

Have experience with or regularly leave home and travel in the community OR travel with someone with a disability

For more information or to schedule a time to participate in the study please contact:

Sierra Berquist

Research Assistant

**Study: In Caregiving, These Mindfulness**

## Practices Could Help

Family members who care for a loved one with dementia often experience chronic stress, anxiety and depression. Psychological research into mindfulness remains a fairly nascent field of study, but mindfulness practices have numerous benefits for care partners.

Research conducted by Felipe Jain, Director of Health Aging Studies at Mass General Hospital, has created and established the benefit of a mindfulness and guided imagery approach, Mentalizing Imagery Therapy (MIT), for family dementia caregivers.

The focus of Dr. Jain's research is now to identify strategies to deliver caregiver skills training and relaxation techniques remotely to improve caregiver well-being. The research has been funded by the National Institute on Aging and private foundations.

To learn more about how mindfulness can benefit caregivers, click [here](#). To sign up for an upcoming Mentalizing Imagery Therapy study, click the red button below.

## How to Share Caregiving Responsibilities with Family Members

Caring for an older family member often requires teamwork. While one sibling might be local and take on most of the everyday caregiving responsibilities, a long-distance caregiver can also have an important role.

As a long-distance caregiver, you can provide important **respite to the primary caregiver** and support to the aging family member.

## Making the Invisible Visible: State Strategies for Identifying and Reaching Family Caregivers

Family caregivers — often relatives, friends, and neighbors — provide vital assistance to support the health and functional needs of older adults, but often face physical, emotional, and financial challenges related to their caregiving responsibilities.

Many states are seeking to better support this important workforce, particularly family caregivers in communities of color, but need an effective way to accurately identify the number, diversity, and unique needs of family caregivers in their state.

In identifying family caregivers, states should recognize cultural considerations, including distinct racial and ethnic perspectives associated with caregiving, that may have implications for identification.

This brief by the Center for Health Care Strategies presents key strategies to help states better identify and reach family caregivers.

## AARP/National Geographic "Second Half of Life Study"

Older Americans are not only the happiest adult Americans as a whole, but also consider themselves healthier and more financially secure than those in their 40s and 50s, reveals a new study published in *AARP Bulletin*. The "Second Half of Life Study," conducted with *National Geographic*, surveyed thousands of adults age 18 to 90 to explore how Americans perceive their current life, their expectations for the future and aging in general as we emerge from the COVID pandemic. About two-thirds of adults over 80 said that they were living their "best possible life" or close to it, compared with just 1 in 5 younger adults.

The study disproves many common misconceptions about aging and suggests that greater focus should be put on adults in their 40s and 50s, who reported higher levels of stress and worry and lower levels of life satisfaction and health than older Americans.

## The National Resource Center for Engaging Older Adults

### New Additions to the engAGED Innovations Hub

The engAGED Social Engagement Innovations Hub houses best and emerging social engagement programs. Searchable by a variety of filters—including social engagement intervention type, geographic area served or partners involved—the Innovations Hub gives you access to replicable examples to inspire and inform your organization's social engagement efforts. Each program summary within the Innovations Hub contains all you need to know about that particular program, such as partners involved, outcomes demonstrated, lessons learned, resources needed and contact information to learn more.

To access the Hub, click the red button below.

### Improving Representation in Clinical Trials and Research: Building Research Equity for Women and Underrepresented Groups

The United States has long made substantial investments in clinical research with the goal

of improving the health and well-being of our nation. There is no doubt that these investments have contributed significantly to treating and preventing disease and extending human life. Nevertheless, clinical research faces a critical shortcoming. Currently, large swaths of the U.S. population, and those that often face the greatest health challenges, are less able to benefit from these discoveries because they are not adequately represented in clinical research studies. While progress has been made with representation of white women in clinical trials and clinical research, there has been little progress in the last three decades to increase participation of racial and ethnic minority population groups. This underrepresentation is compounding health disparities, with serious consequences for underrepresented groups and for the nation.

At the request of Congress, ***Improving Representation in Clinical Trials and Research: Building Research Equity for Women and Underrepresented Groups***, identifies policies, procedures, programs, or projects aimed at increasing the inclusion of these groups in clinical research and the specific strategies used by those conducting clinical trials and clinical and translational research to improve diversity and inclusion. This report models the potential economic benefits of full inclusion of men, women, and racial and ethnic groups in clinical research and highlights new programs and interventions in medical centers and other clinical settings designed to increase participation.

and tomorrow

## How to Get Help from Social Security

Local Social Security offices are offering more in-person appointments and have resumed in-person service for people without an appointment.

As in-person service expands, the Social Security Administration expects its offices to become increasingly busy. The SSA strongly encourages beneficiaries seeking assistance to continue to go online, call for help, and schedule appointments in advance.

The Social Security Administration has provided a fact sheet for those seeking assistance. To read the fact sheet, click the red button below.

## Home Safety Checklist for Alzheimer's Disease

Use the following room-by-room checklist provided by the National Institute on Aging to alert you to potential hazards and to record any changes you need to make to help keep a person with Alzheimer's disease safe. You can buy products or gadgets necessary for home safety at stores carrying hardware, electronics, medical supplies, and children's items.

To view the checklist, click the red button below.

## At a Glance: Reducing Disability in Alzheimer's Disease

Check out this 1-page infographic for a quick, top-level overview of Reducing Disability in Alzheimer's Disease (RDAD), a dementia caregiving program that offers 12 in-person (individual or group) exercise training and education sessions for caregivers and persons living with dementia. It's focused on gentle exercise for the person with dementia and caregiver training to manage behavioral symptoms and identify pleasant events.

Feel free to print it out, save for reference or send to a peer or colleague who may be interested learning more about the program. You can find full information, including program components and characteristics, research evidence, sustainability strategies and more at the program's full [profile page at Best Practice Caregiving](#).

## A Caregiver Program that Creates Lasting Improvements

BRI Care Consultation™ is a proven care-coaching solution delivered by telephone and email to adults with health conditions and their family or friend caregivers, empowering both to more effectively manage short- and long-term needs.

BRI Care Consultation uses a combination of ongoing assessment, action planning and follow-up support to create real and lasting changes in the caregiving situation, resulting in a decrease in unmet needs, stress and strain, and symptoms of depression for both caregivers and the person receiving care.

BRI Care Consultation helps to change the cycle of ongoing care, uncovering alternatives to current care methods, identifying helpful new community resources, mobilizing family and friend assistance, and driving lasting changes in the care situation.

Through numerous research studies, BRI Care Consultation has been proven to provide positive outcomes, including:

- Improved satisfaction with care from doctors and other professionals
- Reduced symptoms of depression

- Less relationship strain between the caregiver and person receiving care
- Fewer costly emergency room visits and hospital re-admissions.

## **New Blood Test Can Help Diagnose Alzheimer's Disease**

Alzheimer's disease is characterized by the buildup of a protein called beta-amyloid, which forms sticky plaques on the brain and can cause brain cells to die. Testing for the presence of these amyloid plaques on the brain is an important part of Alzheimer's diagnosis and research.

A study, funded in part by NIA, found that a new blood test can accurately predict the presence of beta-amyloid in the brain. The blood test became even more accurate when the research team took into account the version of APOE (a gene linked to Alzheimer's risk) that each person had. Scientists note that the blood test performs comparably to existing brain scan- or spinal tap-based tests. However, the blood samples used in the study were from majority white, affluent individuals, and may not be generalizable to other demographic groups.

Using blood samples will make it easier to screen healthy people for potential enrollment in Alzheimer's clinical trials and could help lower costs and expand the availability of diagnostic studies for Alzheimer's.

## **Caregiving While Black Course**

Caregiving While Black is a six week culturally appropriate caregiving training and education course. The overall goal of this project is to address the cultural reality of "Caregiving while Black" during a public health crisis. We are aiming to develop and

prototype-test a highly accessible program designed to enhance the mastery of Black American caregivers to provide care to family members or friends living with a dementia illness in a time of crisis.

A \$40 gift card will be provided for participation in each baseline and post-intervention interview and each semi-structured interview.

## Free Course on Diversity, Equity, and Inclusion for Home-Based Care

During National Minority Health Month, the Home Centered Care Institute (HCCI) has launched a new free course entitled, **“Diversity, Equity, and Inclusion for Home-Based Care.”**

This on-demand course, supported (in part) by the Josiah Macy Jr. Foundation, addresses the complex and multifaceted topic of health equity by discussing power and privilege, implicit and explicit bias, inferred cultural preferences, and more, which are especially relevant for providers working with patients and families in their home.

The course, designated for a maximum of 0.5 AMA PRA Category 1 Credit™, provides guidance in developing and implementing best practices for culturally sensitive care in the home environment and within the workplace. While the course targets home-based primary care (HBPC) providers and those interested in HBPC, non-clinical staff members can also benefit from understanding implicit bias as they support interactions with patients and caregivers (such as scheduling or billing), while those in leadership will learn how to better engage and retain high-performing, diverse teams.

To take the course, click the red button below.
